

ABRAM CREATES MUSIC

We have created a heart-warming and captivating music story, “Abram Creates Music”, which may become a classic fairy tale and be used to promote all aspects of “The Adventures of Jingle King & The Notes”. This music fairy tale is all about how music notes originated and how together they are music, the universal language. Every child and parent can instantly relate to music and the charming Abram, and his delightful notes will be embraced for generations to come.

Abram could be a stand-alone character in a series. Additionally, Abram may be an occasional character in a cartoon series where he can add an historical element to a story or the educator of elements of music, or perhaps he could be the focus of some reunions with Jingle King & The Notes. There are many possibilities to explore.
